Experienced Registered Nurses

Theia Health's management team has decades of experience in HCS & ICF. With a profound understanding of provider needs and state regulations, Theia Health can tailor services to meet the provider's needs, improve client outcomes, and implement all of the tools needed to run an efficient and best in class nursing department.

A word from the CEO

The founders of Theia Health Group were at the forefront of developing many of the systems and processes that other similar agencies currently use. With many agencies structuring their approach around telehealth, Theia Health understands the importance of touch.

Although telehealth technologies is an important part of improving services and reducing labor cost, it can never take the place of in-person care.

We are truly grateful to be in position to work with HCS & ICF providers around the state.

Sincerely,

Where experience meets innovation

Theia Health Group has proprietary applications to facilitate improved client outcome and reduce labor costs for the provider. And yes, it's FREE!

ProTriage is a hybrid EHR that promotes improved documentation and notification. With automated reporting and urgent SMS push notifications, Theia Health has the tools that no one else can offer.
